

**is a waterproof coating...**

- **ZYREX** is a waterproof and chemical proof coating, unlike many paints or untreated concrete.
- **ZYREX** will not stain when many chemicals are spilled on it. Thus making clean up faster and easier
- **ZYREX** is a rubberized co-polymer that will protect the concrete better than any paint.
- Our unique **ZYREX** formulation is environmentally safe and contains no toxic elements that will alter or damage our waterways. It will not flake and fall off like bottom paint.

The **ZYREX**  
advantage  
for Concrete!

# The **ZYREX** advantage for Concrete!

**ZYREX** can be applied using a roller, brush or spray applicator that provides the following consumer benefits.

- Water Proof
- Chemical Resistant
- Easy to Clean
- Enhances Appearance
- Reduced Maintenance
- Stain Resistance
- Environmentally Friendly
- Non-Toxic
- Easy Application
- Long Lasting

## **ZYREX** looks great!

Due to self-leveling properties **ZYREX** dries to a smooth High gloss shine when applied with a brush or roller.

Zyrex on Right  
Bare Concrete on Left

**ZYREX** is long lasting.

After applying **ZYREX** just sit back, relax and enjoy.

Clean up time is cut in half!

## VARIETY

**ZYREX** comes in a variety of colors. Black, Light Gray, Dark Gray, Blue, Red, Yellow and Tan. If you want a custom color provide us with a sample and we will match it as close as possible.

10 gallon minimum for custom match colors.

**ZYREX** has special formulations to be used on steel and aluminum.

Customers have tried it on many different surfaces. So let your imagination run wild. If it can be painted it can be **ZYREX**. But let us know the application so we can get you the right formula.
